Kimberly Rashard Williams
Strength Sanctuary
A wooden sculpture with rope seat in J&J Smith Gallery, Smith Hall. April 23-28.

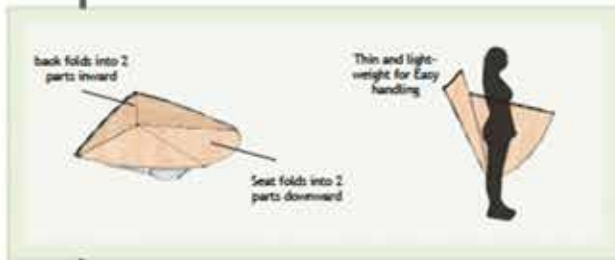

This meditation habitat is based upon the belief that suspension enhances the meditative experience. I intend to inspire outer body thought and prospective experiences through video and an unusual daily experience by being suspended in the air while being seated. The rope bed employs principles of sustainability by re-use of materials to create a new experience.

MEDITATION HABITAT

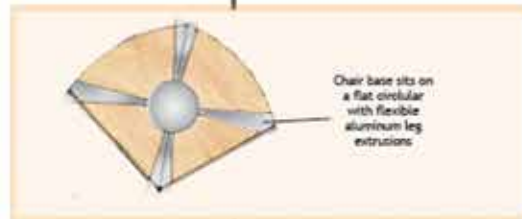

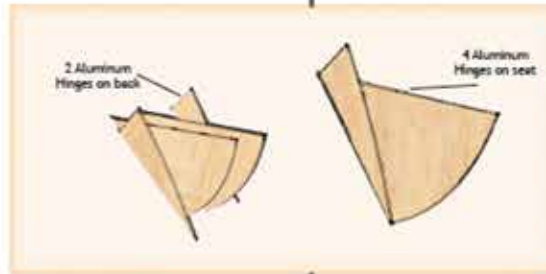

THE TORTI HUMAN INTERACTION

The TORTI is a meditation chair meant for anyone who enjoys the art of meditation. It is low to the floor and compact for easy storage and travel.

THE TORTI MATERIALS

The TORTI is made out of 2 cm bent plywood with aluminum hinges and legs

THE TORTI PACKAGING

The TORTI can be easily flatpacked and shipped as well as stored in anything from a garage to a storage closet

The TORTI named after its resemblance of a folded tortilla

RESIDENTIAL - SUSTAINABLE APARTMENT

RESIDENTIAL - SUSTAINABLE APARTMENT

- + Skylight for excess natural lighting
- + Induction oven for efficient energy use
- + Cabinets made from FSC Wood

- + Foot pedal sink to reduce water usage
- + Stoneware dishes for longterm and sustainable use.

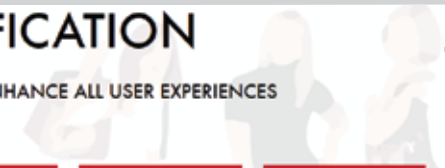

HANDBUILT STOOL

Meant to be a functional stool for Syracuse Salt Library, but a bar stool was deemed a better fit for the library. the Rendering on the right shows the bar stool ideation.

COMMERCIAL/RETAIL- SEPHORA COSMETICS

In order to aid SEPHORA in connecting with the consumer and meeting their cosmetic needs the new store design will help redefine the “See, Try, Buy” strategy. SEE & TRY will be redefined by integrating interactive technology and new gondola organization and BUY through new self-check out and cashier stations.
